ABOUT THE SOCIETY FOR ETHNOPHARMACOLOGY (SFE)

Society for Ethnopharmacology (SFE), India is a registered society under the West Bengal Society Registration Act and is affiliated to the International Society for Ethnopharmacology. The society formed in 2013 has made its presence throughout the country, providing networking opportunity for development and promotion of medicinal plants and ethnopharmacology.

The Society works on dissemination of knowledge in this area through different local chapters made in different parts of India with the major goal on "Globalizing local knowledge and localizing global technologies."

Visit: www.ethnopharmacology.in for more details.

ABOUT THE CONFERENCE

The theme of the conference is "**ETHNOPHARMACOLOGY: GLOBALIZATION OF TRADITIONAL MEDICINE**". The traditional medicines, folk medicines, tribal systems, etc. have been contributing in a big way in the health care from time immemorial and they continue to contribute even in this era of modern medicine. COVID-19 pandemic almost compelled us to look at herbal drugs as a safer, better and reliable alternative for modern medicines in certain cases. There are genuine challenges in the areas of sustainability, safety, efficacy and quality of herbal drugs. There appears to be a big gap here which needs collaboration than competition. There is a need for modern scientific methods to relate and collaborate for the progress in ethnopharmacology for a healthy world.

Hence, we shall focus and deliberate on strong rationale, newer technologies, better strategies to discover newer drugs and formulations from the nature. The conference will highlight on several crucial and contemporary issues on the ethnomedicine, Ethnopharmacology and Medicinal Plant Research by the renowned scientists across the globe. We hope this conference will provide a platform for the participants to present their research work, interact, debate and disseminate ideas amongst the distinguished professionals, eminent scientists, technologists, industrialists and traditional health care professionals.

On behalf of the organizing committee D. S. T. S. Mandal's College of Pharmacy, Solapur, P. A. H. Solapur University, Solapur and Society for Ethnopharmacology, it is our pleasure to invite you to participate in this conference and explore the opportunities.

OBJECTIVES

The main motto of the Conference is to disseminate the knowledge on Traditional Health Products through the globalization of local knowledge and the localization of global technologies.

The conference is planned with the following objectives:

- To familiarize with the modern knowledge on the herb, herbal remedies, herbal quality assurance, herbal trade and commerce and herbal drug development so that the person with local knowledge can be upgraded.
- To bridge the gap between the academia and industry.
- To bring the Scientific and Teaching professionals in Ethnopharmacology and the professionals of other areas interested in developing cost-effective natural remedies, under one umbrella.
- To promote the knowledge in the field of natural product research.
